

# EYELASH ENHANCEMENT

**Our eyelash enhancement serum works gradually to deliver real measurable growth. For lashes with more length, thickness and darkness, simply apply our solution for a few weeks and see the amazing results.**

## The Treatment

Great eyelashes make your eyes look bigger and your face look more attractive. Now you can have them in just a few weeks with our eyelash enhancement serum.

This treatment lengthens, thickens and darkens eyelashes by extending the growth phase and increasing the number of hairs that sprout.

You simply apply the serum by dabbing it on the upper lash line each night. The serum spreads to your lower lash line automatically as you blink/sleep.

***Please note – you should never apply it in your eye or onto your lower lid.***

***Before you apply, your face must be clean, without make-up and your contact lenses removed.***

After a few weeks of nightly use, you will begin to see results. After three months, your lashes will show spectacular growth.

If you stop using the serum, your eyelashes will gradually return to their former state.

## Following Treatment

Our eyelash enhancement serum is safe for most people. However, you may not be a candidate if you have certain eye conditions, e.g. conjunctivitis, certain allergies or skin infections of the upper eyelids.

***A consultation with Dr Saleh is always necessary before the serum can be prescribed to you.***
