

DERMAL FILLERS

Dermal fillers create volume resulting in a healthy appearance. The effects of dermal filler treatment can be seen quickly, smoothing facial wrinkles and giving a natural, more youthful appearance.

A dermal filler treatment is perfect for filling in facial wrinkles.

Dermal fillers may also be used for lips or cheeks to give you a more youthful appearance.

At consultation Dr Saleh will discuss with you any relevant medical history, try to ascertain your expectations, determine your suitability for treatment and then discuss possible treatment options for you to consider.

Dr Saleh will explain the treatment processes and any possible risks and complications and provide you with post-treatment advice.

Following Your Treatment

You may experience redness, bruising, swelling or tenderness at the site of treatment. This is a normal treatment response that will resolve itself within a few days.

You may gently massage the area to help correct any initial unevenness until the product settles. Do not expose the treated areas to intense heat (solarium, sauna) for at least 48 hours after treatment.

Following lip augmentation, the lip may feel tender and appear uneven. This will gradually resolve itself within the first week and will not affect the final result. If you have suffered from cold sores, the treatment may cause a fresh outbreak. If this occurs you may use Zovirax cream.

It is possible that there may be a slight visibility of the dermal filler below the surface of the skin.

There is a remote possibility of injection of the material into a blood vessel which could result in blockage of blood flow and loss of circulation to nearby skin causing an area of soreness.

Allergic response or infection after such treatment is rare.

If you have any problems or concerns, please contact the clinic.

We hope that you are happy with your treatment.

Please remember that the treatment will only last for approximately 4-6 months and, therefore, it is advisable to make a further appointment after that time.
